

## Recommended Care and Maintenance Tips

Routine care and maintenance will keep Sonata™ looking new and as great as the day it was installed.

### **Routine Care For Sonata™ Countertops**

- Cleaning with soapy water or ammonia-based cleansers will remove most dirt and stains. Stubborn stains can be removed with bleach or bleach-based cleansers or non abrasive cleansers such as Soft Scrub™.
- Do not use harsh chemicals  
The surface can be damaged by harsh substances, including chemicals such as paint thinner, mineral spirits or acetone based nail polish remover.
- Prevent heat damage  
As with all countertop materials, it is important to minimize direct heat exposure. High temperatures can damage the surface. To prevent damage always use hot pads or trivets under frying pans, hot pots or heat-generating appliances.
- Remove minor cuts and scratches  
As with all countertop materials, you should not cut directly on your Sonata™ countertop. Minor scratches can be removed by lightly sanding with 220 or higher grit sandpaper, followed by scrubbing with an abrasive cleanser.

For severe scratches, consult your local outlet.

### **Routine Care For Sonata™ Solid Surface Sinks**

- Cleaning  
Clean sink with any ammonia-based household cleanser. Soft Scrub® and a green Scotch-Brite® pad may also be used to remove residue. Rub green Scotch-Brite® in finish. NOTE: Do not use on the countertop surface.
- Disinfecting  
Fill the sink 1/4 full with diluted household bleach (1 part water / 1 part bleach). Be sure to get some of the solution into the overflow opening to disinfect. Let the solution stay in the sink for 15 minutes, then wash sides and bottom as solution drains. Rinse with water.
